We rented a car in Barbados and used this map to travel around the country. This map had roads in clear detail allowing us to readily find our way. It was especially helpful along the Northern coast east of the Animal Flower Cave area where cell phone based Google Maps was not always reliable. If you are decent map reader and are looking for a dependable way to find your way around the island by car then I would highly recommend.

Perfect as me needs as a professional geographer and frequent traveler

This is a very detailed map of Barbados, its scale 1:40,000 makes it excellent for hiking and cycling. Includes an inset with street plan of central Bridgetown and a place name index. Provides rich information about places of interest, beaches, accommodation and travel related activities.
