**Princeton Review : Best 290 Business Schools, 2008 Edition (Graduate School Admissions Guides)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Best 290 Business Schools, 2008 Edition (Graduate School Admissions Guides):

0 of 0 people found the following review helpful. five stars By Dwight Owen The information given is quite dry and run of the mill - stuff you could easily find on the Internet. Fees, schools recruited, acceptance rate, etc. And truth is nobody is starting from a list of 290 and boiling it down to five or six. Therefore - I found little value in this. I'd rather find my long list of twenty schools, do some research on each (which would be equivalent to one page in the book), and then follow it up with some critical books on the MBA admission process. Sorry Princeton Review - no love here. 2 of 2 people found the following review helpful. Pretty useless... By RLIMy primary complaint about this book is

that much of the information is out of date. For instance, schools' tuition costs are often significantly different than those directly stated on their websites. Some of the information about the culture is helpful, but could easily be discerned from reading information about schools online or perhaps in other books. A lot of the other information is intuitive or so cursory to be useless. Better to look at information on the Business Week B-School website or other internet resources or just go to the bookstore and simply glance at the schools you're considering. Absolutely not worth owning. 1 of 1 people found the following review helpful. Too many schools - too little info. By djveedI wasn't too hot on this book. Each of the 290 schools are detailed on one single page, leaving little room for deeper analysis. The information given is quite dry and run of the mill - stuff you could easily find on the Internet.
